Type: ROUTINE INSPECTION
Date: 07-AUG-2024

2.40(b)(3)

Repeat

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A tiger was limping on the left rear and then right rear leg intermittently during inspection. Initially the limp was pronounced, but then it was difficult to appreciate when the animal slowed down. The facility had not identified the limp or communicated it to the attending veterinarian at the time of inspection. Facility must observe animals daily to assess their health and well-being and communicate timely and accurate information on problems of animal health, behavior and well being to the attending veterinarian.

2.131(b)(1)

Handling of animals.

In the last 9 months, there have been three events of stress- induced trauma of 2 deer housed in an enclosure. In January 2024, employees reported finding a neighbor's dog running around the deer enclosure, panicking the deer, and resulting in self injury to the deer . In February 2024, the deer had another stressful event (an employee cutting grass around the enclosure) which panicked them and caused reinjury. The third event occurred 8/4/2024 as the deer were found in a state of panic and had new wounds. The facility added additional fencing after the first event, but this mitigation effort was unsuccessful and two additional incidents occurred. Handling of all animals shall be as expeditiously and carefully as possible in a manner that does not cause behavioral stress or unnecessary discomfort.
Correct by: 08/23/2024

The disposition of one macaw and one ring tailed lemur are still under review.

The inspection and exit interview were conducted with the Facility Representative.

Additional Inspectors:

Gustavo Soberano, Assistant Director

Laurie Gage, Field Zoological Species Specialist
