Type: ROUTINE INSPECTION
Date: 11-AUG-2014

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

2.40 (b)(2)

An adult red tabby, male cat referred to as "King Kong" had yellow nasal discharge. The licensee was not providing treatment to the cat nor was she aware that the cat was exhibiting these symptoms. Two other cats at the facility are currently under treatment for similar symptoms. The licensee has a written protocol for treatment of upper respiratory symptoms provided by her attending veterinarian on 7/30/14. The licensee shall provide treatment as instructed by the attending veterinarian in the treatment protocol and use direct and frequent communication with the veterinarian to discuss changes in animal's behavior, health or if the condition persists following treatment.

3.1(c)(3) REPEAT

HOUSING FACILITIES, GENERAL.

(c) Surfaces (3) Cleaning

The white, plastic panels that line 3 sides of the enclosures still have brown and yellow areas of grime on their surface. Adequate cleaning and sanitizing is a crucial aspect of animal husbandry which helps to prevent disease and provide for the health of the animals. The licensee shall clean the hard surfaces in contact with the animals daily and sanitize routinely to prevent accumulation of excreta and reduce disease hazards.

A focused inspection and exit briefing was conducted with the licensee on August 11, 2014. This inspection was limited to both direct and indirect non-compliant items 2.40(b)(2) and 3.1 (c) (3) found during a routine inspection on July 29, 2014. The licensee provided records that documented the two adult cats ID# 31 and #36 were examined by the attending veterinarian and given a written diagnosis and treatment plan. Both cats are receiving treatment as prescribed.
