Type: ROUTINE INSPECTION  
Date: 28-JUL-2015

### 2.40(a)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The approved written Program of Veterinary Care (PVC) did not include rabbits. All covered species should be addressed in the PVC to ensure the facility has a program to follow concerning the care of all the animals. Failure to do so could adversely affect the health and well-being of the animals. A complete and accurate written Program of Veterinary Care with consultation from the attending veterinarian must be in place.

### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

There was not a record of animals on hand being kept with the required information concerning acquisition and disposition for the covered species at this facility. Complete and accurate animal records must be kept in order to facilitate tracking of animals. Records must be maintained that fully and correctly disclose information concerning all animals purchased or otherwise acquired, owned, held, leased, transported, sold, euthanized or otherwise disposed of and shall include any offspring born while in the licensee's possession.

Correct by 08/17/2015

### 3.25(c)

#### FACILITIES, GENERAL.

A large, plastic bag containing timothy hay used to feed the guinea pigs and rabbits is currently being stored on the floor of an empty animal enclosure. Food stored in this manner and location does not adequately protect such supplies against deterioration and infestation or contamination by vermin. Food for all animals must be stored in facilities which provide adequate protection against infestation, deterioration, or contamination by vermin. Additionally, supplies of food for guinea pigs must be stored in containers with tightly fitting lids or covers. A system of food storage which adequately protects the supplies of food for all animals must be in place.
