Site: 003

EUGENE BURKHOLDER

Type: ROUTINE INSPECTION

Date: 08-JUL-2015

---

No non-compliant items identified during this inspection.

This is a focused inspection on the NCIs from June 11, 2015.

Both sows #858 and #97 have been treated and the issues resolved. The facility has addressed any health related issues in the future by instituting a written treatment protocol for swine health issues which included staff training by their attending veterinarian. This training also included proper handling techniques and protocols for the transport of young pigs. Once trained the staff sign a document for the facilities records.

All other NCIs have been resolved and the facility is now keeping daily records of pest control treatments when applied including written records of any maintenance conducted and health treatments given.

Exit interview conducted with facility representative.
