

## Inspection Report

Tregembo Animal Park  
5811 Carolina Beach Road  
Wilmington, NC 28412

Customer ID: **21143**  
Certificate: **55-C-0183**  
Site: 001  
TREGEMBO ANIMAL PARK

Type: ROUTINE INSPECTION  
Date: 10-FEB-2016

### 3.80(a)(1)

#### PRIMARY ENCLOSURES.

In the brown capuchin enclosure housing two monkeys in the winter primate house, the remnants of a platform were evident. Twisted and heavily damaged pieces of wood were present, posing an injury hazard to the monkeys. In the ring tailed lemur enclosure in the winter primate house, the lemurs were sitting on a heavily damaged/chewed wooden shelf, posing an injury hazard to the lemurs. Primary enclosures must be structurally sound and kept in good repair. Correct by repairing or replacing the platform and shelving to ensure the safety of the animals.

### 3.84(b)(2)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

All enclosures in the primate winter house contained evidence of dirt and debris build-up. This build-up can pose a health hazard to the animals via disease transmission or exposure to harmful organisms. Indoor primary enclosures are required to be sanitized at least once every 2 weeks and as often as necessary to prevent buildup. Correct by implementing a thorough cleaning and sanitization program that complies with the guidelines in this section.

### 3.131(a)

#### SANITATION.

There was evidence of excreta build up and/or wet straw in the capybara hutch, the fennec fox enclosure, the flying squirrel enclosure, and the goats shelter area. Excess excreta and/or wet straw poses a health hazard to the animals and may prevent animals from having sanitary shelter from the elements. Correct by cleaning the affected areas as often as necessary to maintain adequate sanitation.

Exit interview conducted with facility representative, Lisa Macelderry, VMO and Mary Ann McBride, VMO.

#### Additional Inspectors

Macelderry Lisa, Veterinary Medical Officer

Prepared By: MARY ANN MCBRIDE, D V M USDA, APHIS, Animal Care
