Forest Preserve District Of Cook County
536 N Harlem Ave
River Forest, IL 60305

Customer ID: 2916
Certificate: 33-C-0410
Site: 004

NW DIVISION HEADQUARTERS

Type: ROUTINE INSPECTION
Date: 01-APR-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Upon review of records, it was noted that a juvenile male elk (#WJLD) was thin (63.5 kg, 128.8 lbs) and in poor body condition. The animal's condition had not been reported, nor did the animal receive veterinary care in a timely manner. This contributed to the death of the animal. It is the responsibility of the licensee to maintain programs of veterinary care that utilize appropriate methods to prevent, control, treat, and diagnose diseases and injuries in order to promote the health and well-being of the animals.

To be corrected: From this day forward.

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A juvenile male elk (#WJLD) did not receive appropriate veterinary care in a timely manner. The male elk was noted to be thin and in poor body condition. The animal's condition was not noted and reported in a sufficient amount of time to receive appropriate veterinary care. Inadequate, timely veterinary care contributed to this animal's death.

Assure that all problems of animal health, behavior, and well-being are conveyed to the veterinarian in a timely manner.

To be corrected: From this day forward

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

The records of disposition and animals on hand did not accurately reflect the actual animal numbers during the time of inspection. The records did not reflect six animals that are no longer at the facility. Records containing all of the required information in 2.75(b)(1) of this subpart must be maintained to account for all animals entering and leaving the facility.

Inspection Report

Update the records and assure that all acquisitions and dispositions of animals are reflected in the records in a timely manner.

To be corrected: 4-15-14

3.125(a)

FACILITIES, GENERAL.

The pasture fence is in disrepair. A section of the pasture fence, constructed of cyclone wire, has become unattached from the base post. The unattached section, approximately two feet wide, is located approximately twenty feet east of the north gate. This has left a gap between the ground and the bottom of the fence. Wild animals and unauthorized people could potentially enter the elk pasture through this gap.

Repair or replace this and any of the fences that are in disrepair.

To be corrected: 6-8-14

The inspection exit briefing was conducted with the facility representative.
