Site: 001
RICHARD PECK

Type: ROUTINE INSPECTION
Date: 19-JUN-2014

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

The record of animals on hand has not been updated and was incomplete. There was lacking information for various animals that have been moved on/off of the property over the past year. Records must indicate a date and where the animals were moved to or note if an animal died. For all of the animals listed, there was not any information for where they came from or if they were born on the property. Records must indicate where each animal came from. Maintaining detailed records of animals on hand is important for health management decisions and also a requirement under the Animal Welfare Act. Maintain records as required and update them regularly.

Correct by 6/23/2014.

3.125(a)

FACILITIES, GENERAL.

The muntjac housed at the facility was reported to have gotten out of it's enclosure and was found dead in the neighboring enclosure containing a donkey. Not containing animals appropriately can lead to their injury or death. Enclosures must be maintained in good repair to contain the animals and protect them from injury.

Correct from this day forward.

Exit interview conducted with facility representative.

Additional Inspectors

Ranslem Corbin, Animal Care Inspector
