DONALD CONRAD

Type: ROUTINE INSPECTION

Date: 05-MAY-2016

3.1(a) REPEAT

HOUSING FACILITIES, GENERAL.

A wire fence attached to an outdoor run on the American Eskimo dog building is in disrepair. Rusty and broken wires have created a 6 inch by 4 inch opening in the wire fencing. Two adult American Eskimo dogs are being housed in this enclosure. There are at least three sharp wire points the dogs can come in contact with. The facility representative stated that he has another enclosure he could move the dogs to. He also stated he has the materials needed to replace the fencing.

The potential for injury exists if the dogs come in contact with the sharp points or get caught in the openings created by the broken wires. The licensee must ensure all enclosures are kept in good repair, protect the animals from injury and contain the animals securely at all times.

Exit interview conducted with facility representative
