Type: FOCUSED INSPECTION

Date: 20-AUG-2025

3.150(a) Critical

Facilities, general.

Per facility records, two diamond doves and one golden pheasant are missing. The facility stated that two diamond doves went missing on separate dates, one September 16, 2024 and the other on December 2, 2024. The facility identified a gap under the enclosure door that may have allowed a predator in or the birds out. Then, on June 26, 2025, a golden pheasant went missing from its enclosure and the facility suspected a snake was the cause.

Failure to provide a safe primary enclosure can result in injury and/or death of the birds contained within. Housing facilities for birds must be designed and constructed for the species of bird housed in them, must be kept in good repair, protect the birds from injury, and restrict other animals from entering that may negatively affect the welfare of the birds.

Corrected prior to inspection on August 20, 2025.

3.81(a)(3) Critical

Environment enhancement to promote psychological well-being.

Per facility records, two female green monkeys had to be euthanized due to their injuries on July 14 and 15, 2025. Per a facility representative, the troop had been fighting for two weeks prior during breeding season.

Housing nonhuman primates together that are incompatible can lead to undue stress, injury and may lead to animal deaths. Nonhuman primates may not be housed with animals unless they are compatible, do not prevent access to food, water, or shelter by individual animals, and are not known to be hazardous to the health and wellbeing of each other.

Corrected prior to inspection on August 20, 2025

This inspection and exit interview were conducted with a facility representative.
