DAVINCI BIOMEDICAL
RESEARCH PRODUCTS INC

Type: ROUTINE INSPECTION

Date: 06-NOV-2023

2.31(d)(1)(ii)

Institutional Animal Care and Use Committee (IACUC).

IACUC approved protocol #787 and amendment #2 to IACUC approved protocol #775 did not provide a written narrative description of the methods and sources used to determine that alternatives were not available to a major operative procedure that may cause more than momentary pain or distress to the animals that is included in #787 (lobectomy) and in the amendment to #775 (thoracotomy).

Per this Section, whenever proposed activities or proposed significant changes in ongoing activities of a proposal for animal use contain procedures that may cause more than momentary pain or distress to the animals, the IACUC shall determine that: (1) the principal investigator has considered alternatives to those procedures and (2) that the principal investigator has provided a written narrative description of the methods and sources used to determine that alternatives were not available. These requirements ensure that all procedures contained in the protocol minimize discomfort, distress, and pain to the animals. The IACUC needs to address this item identified for these protocols. Correct by 12/11/23.

2.31(e)(3)

Institutional Animal Care and Use Committee (IACUC).

IACUC approved protocols #787 & #781 did not provide a complete description of the proposed use of the animals. #787 lacked a complete description for the lobectomy and #781 lacked a complete description of the laminectomy.

Per this Section, proposals to conduct an activity involving animals must contain a complete description of the proposed use of the animals so the IACUC can determine during its review that all components of the animal use proposal are in accordance with the requirements as outlined in this subchapter of the AWA. The IACUC needs to address this item that was identified for these protocols. Correct by 12/11/23.

This inspection and exit briefing were conducted with facility representatives.
