Site: 001

MEADOW VIEW GROWERS INC

Type: ROUTINE INSPECTION  
Date: 19-OCT-2015

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The facilities current Program of Veterinarian Care is missing specific guidance on dosage, method of administration and frequency/routine of administration on the medications and vaccinations that are currently listed. Without specific guidance from the attending veterinarian, there is no way to ensure the animals are receiving the appropriate veterinarian care and treatment. The written Program of Veterinary Care must provide specific guidance from the Attending Veterinarian on the proper dosage, method of administration and frequency/routine of administration for all medications and vaccinations listed.

Correct By: 11/2/2015

### 2.131(c)(2)

#### HANDLING OF ANIMALS.

This facility allows the public to hand feed their goats. The public is able to walk directly up to the animals enclosure and pet or feed them. During today's inspection, there is an area next to the enclosure where activities are set up for the public. There is an attendant in this area overseeing the activities. However; they are not dedicated to the animals' area. In addition, there are several areas of the fence line that cannot be properly observed from the area with the attendant. All handling or contact with the animals must be done in a manner that does not cause trauma, behavioral stress, physical harm or unnecessary discomfort to the animals. Without a barrier between the animals and the public or without an attending present at all times of public contact, this facility is not able to monitor the public's interactions with the animals. A responsible, knowledgeable, and readily identifiable employee or attendant must be present at all times during periods of public contact or a barrier must be provided with a sufficient distance between the animals and the public as to minimize the risk of harm to the animals and to the public..

Correct By: 11/19/2015

### 3.131(d)

#### SANITATION.

Prepared By: SHANNON SEBERA, A C I USDA, APHIS, Animal Care

Received by Title: RETAIL MANAGER

Date:  
19-OCT-2015

## Inspection Report

---

The facility is currently using a three sided structure as shelter for their goats. Inside the structure there are several bird nests and bird droppings on most of the solid surfaces. In addition, there are several areas with piles of old molding bird droppings. Birds can be carries of several communicable diseases. There is an increased chance of these animals being exposed to the hazards without the facility having an affective pest control program or affective program for cleaning and/or eliminating the droppings, This facility must ensure that establish and maintain an affective pest control program.

Correct by: 11/2/2015

Inspection was conducted with the Retail Manager and Animal Care Inspector Shannon Sebera.

The exit was conducted with a facility representative, the Retail Manager and Animal Care Inspector Shannon Sebera.
