ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The kennel consists of two trailers which act as indoor housing. In Kennel facility there are five adult dogs which need to be evaluated by the attending veterinarian. In trailer one there are three adults which need evaluating. One adult is a female Poodle approximately one year old, no ID, it has nails on both front paws which need to be trimmed and is favoring its left rear leg. There is an adult cream colored male, chip #038025852 who needs to be evaluated for its upper jaw teeth on both sides which are covered with dark matter. There is also an adult female Chihuahua, chip# 0A01312179, who was observed during the inspection with the center pad of her right rear foot stuck in the coated wire flooring. The dealer removed the animal's foot during the inspection. The nails of the left front and right rear were long and growing sideways. The animal's jaw teeth on both sides were covered in dark matter. In trailer two there are two adults which need to be evaluated. There is one female adult Yorkie, chip #0A10183077, with green discharge which was dry around the right eye. The animal had a build up of dark matter along both sides of its jaw teeth. There is an adult female Shih tzu approximately six years old, chip # 100015333, The animal has red scabby areas on its neck back and hips. The dealer must maintain written documentation of the evaluation and all treatment to protect the health and welfare of the animals.

Affect five adults. Correct by June 26, 2014

3.1(e)

HOUSING FACILITIES, GENERAL.

In the trailer one there is a food storage barrel which was currently holding bulk food. The interior surfaces need to be cleaned to remove a build up of hair and the exterior lid surface has an accumulation of blue particles which the dealer identified as fly bait. Supplies of food must be stored in a manner that protects the supplies from spoilage, contamination, and vermin infestation. All open supplies of food and bedding must be kept in leakproof containers with tightly fitting lids to prevent contamination and spoilage. Substances that are toxic to the dogs but are required for normal husbandry practices must not be stored and used in a manner which protects the food from contamination to protect the animals from injury and to protect their health and welfare.

Affects eighty-five adults. Correct by June 26, 2014

3.1(f)

HOUSING FACILITIES, GENERAL.

In trailer one the dealer has cut window / vents under the lower raised wire enclosures. There is not a wash down for the lower enclosures. The waste material is collected on the floor and washed into a drain. During cleaning the solid waste material is collecting in the window vents. The waste needs to be removed and maintained to prevent accumulations, facilitate husbandry practices, prevent the spread of disease and to protect the health and welfare of the animals.

Affects eighty-five adults.

Correc by June 26, 2014

3.6(a)(2)(1)

PRIMARY ENCLOSURES.

The kennel consists of two trailers which act as indoor housing. The enclosures in both trailers are constructed of coated wire and in some cases wooden materials. In trailer one there are two enclosures containing a total of four adults and in trailer two there are eight enclosures containing a total of seventeen adults and seven puppies which have broken and or protruding wires in the enclosures. The broken wires must be repaired or removed to protect the contained animals from injury and to protect their health and welfare.

Affects twenty one adults and seven puppies.

Correct by July 7, 2014

3.9(b)

FEEDING.

Through out the kennel facility there are a total of seven food receptacles affecting ten adults and eight puppies whose food receptacles need to be cleaned and sanitized. The self feeders had varying amounts of dust, hair and one contained moldy food. The self-feeders must be kept clean and must be sanitized every two weeks. The dealer stated he has been cleaning the receptacles approximately once a month. Measures must be taken to ensure that there is no molding, deterioration, and caking of feed to protect the health and welfare of the animals.

Affects ten adults and eight puppies.

Correct by July 8, 2014

3.11(c)

REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Through-out the interior of the both trailers there is an accumulation of hair, dead bugs on the medicine containers, dirt spider webs on the fans, surfaces adjacent to the enclosures, on the floor and through-out the room. Premises
