Certificate: **93-A-0215**
Site: 001
AGBIO COMPANY

Type: ROUTINE INSPECTION
Date: 19-APR-2023

3.56(b)(3)

Sanitation.

In several of the rabbit enclosures, there was rust present on the wire, resulting in the enclosures no longer being able to be effectively sanitized or cleaned as required under 2.56. Rust creates a surface that cannot be effectively sanitized because of the uneven nature and can harbor organisms harmful to the welfare of the animals contained in the enclosure.

Correct by 10 May 2023

This inspection and exit interview were conducted with the manager.
