Adair, OK 74330

Customer ID: **10605**
Certificate: **73-A-1747**
Site: 001
GARY PHILLIPS

Type: ROUTINE INSPECTION
Date: 19-JUN-2014

3.1(c)(1)(1)

HOUSING FACILITIES, GENERAL.

The gate panels on outdoor enclosures where the Beagles are housed have rusting and structural problems. On at least four of the gate frames the bottom pipe was nearly rust into pieces. The material has deteriorated to the point that sharps edges are forming that could injury the dogs. Injuries from sharps points or rusting metal can be painful for the dogs. The material is no longer structurally sound nor can it be adequately cleaned and sanitized. The enclosures must be secure to contain the dogs adequately and protect them from other animals. Owner must ensure that all fencing panels and gates are routinely maintained so as to protect the health and safety of the animals. To be corrected by 07-05-2014.

Exit interview conducted with facility representative.

Additional Inspectors

Tygart Michael, Supervisory Animal Care Specialist
