2.31(e)(2)

Institutional Animal Care and Use Committee (IACUC).

At the time of the inspection, the facility had two total active protocols pertaining to USDA covered species - one for the guinea pigs, and one for the rabbits. Neither protocol included a rationale for involving animals or the for the appropriateness of the species, which is important to ensure the procedures are appropriate for animal usage, the right species is chosen, and therefore the avoidance of unnecessary discomfort and/or pain. A proposal to conduct an activity involving animals, or to make a significant change in an ongoing activity involving animals, must contain a rationale for involving animals, and for the appropriateness of the species and numbers of animals to be used.
