

## Inspection Report

Wild Animal Safari Inc  
P O Box 1197  
Pine Mountain, GA 31822

Customer ID: **32761**  
Certificate: **57-C-0221**  
Site: 001  
WILD ANIMAL SAFARI INC

Type: ROUTINE INSPECTION  
Date: 04-MAY-2016

### 3.75(c)(2)

#### HOUSING FACILITIES, GENERAL.

There is a small rusted platform in the enclosure containing one (1) Macaque. The rust is showing signs of corrosion and not suitable for use in this state. Rusted areas cannot be cleaned and sanitized appropriately. All surfaces must be maintained on a regular basis. Surfaces of housing facilities--including houses, dens, and other furniture-type fixtures and objects within the facility--that cannot be readily cleaned and sanitized, must be replaced when worn or soiled.

To be corrected by May 30, 2016.

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

There is wire fencing dividing the Camel and Giraffe enclosures. One of the wooden post used to secure the fencing is leaning inward (toward the Camel enclosure). The post is loose in the ground and is not secure. This is creating an injury hazard to the Camel and the Giraffe.

The fencing between the Camel and Giraffe enclosures has wood along the top of it to keep the animals from pushing the fencing down with their long necks. There is one of these support boards along the top of the fence that is broken. The broken and splintering of the wood, could cause an injury to one of the animals within the enclosure.

The two Bears at the facility have an enclosure that can be divided into two separate areas. At the time of inspection, the animals were divided up with each in a separate enclosure. The enclosure on the left has a raised wooden platform for the Bear to lay on. This platform is broken and in need of repair. The Bear could easily be injured by the broken, splintered wood and the platform is not structurally sound. The Bear should not have access to this area until the platform is repaired or replaced. Corrected at the time of inspection by removing the Bear out of the enclosure into the adjoining enclosure with the other Bear.

In the drive through part of the park, to the right of "center court", is a drain pipe. The mouth of the pipe is torn, creating sharp and jagged edges. The pipe, in its current condition, could cause serious injury to any animal who comes in contact with it.

## Inspection Report

---

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

This inspection and exit briefing was conducted by Brenda Pietrosante, ACI and Michelle Williams, VMO, with the facility's Head Zoo Keeper.

### Additional Inspectors

Williams Michelle, Veterinary Medical Officer
