DANIEL COMBS

Type: ROUTINE INSPECTION  
Date: 27-JUL-2015

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\* There is a female sheep that is limping and toe-touching her front left limb. The owner stated that he was waiting and watching to see if it would get better. The attending veterinarian was not consulted about the sheep condition. The licensee must have this animal examined by a licensed veterinarian in order to ensure that an accurate diagnosis is obtained and an appropriate treatment plan is developed and followed. The licensee must ensure that all animals receive adequate veterinary care at all times. Correct by July 30, 2015

### 3.56(a)(1)

#### SANITATION.

\*\* There were 4 rabbits in an enclosure with caked up feces and other debris in the floor of the cage. The primary enclosure should be kept reasonably free of excreta, hair and other debris for the health and well-being of the animals. Correct by August 1, 2015

### 3.125(a)

#### FACILITIES, GENERAL.

\*\* There were 3 goats and 3 sheep being held in an enclosure. The fencing on the east side corner of this primary enclosure had pointy loose ends of wire on the inside of the pen. The goats and sheep could also get access to the barbed wire on the top of the fencing. There was another area of the fencing that buckled at the bottom of the fencing giving potential for an animal to get their hooves entangled in it. All fencing for any animal should be constructed to prevent injury of the animals. Correct by August 3, 2015

The inspection was conducted on July 27, 2015 in which the owner received a word document version of the inspection report. The inspection report was digitally submitted August 3, 2015 in which the owner received it via standard mail.

The inspection and exit briefing was conducted with the owner.
