Type: ROUTINE INSPECTION
Date: 09-FEB-2017

3.55 DIRECT REPEAT

WATERING.

Two enclosures, containing one rabbit each, did not have water at the time of this inspection. Water was provided during the inspection and both rabbits drank from the full water bottles indicating they were thirsty and had not had adequate water supplied for them. Water is essential for life and must be provided daily or as often as needed to provide for the animals water needs. A regular schedule of watering of all animals must be in place and maintained.

Corrected at time of inspection.

3.56(a) REPEAT

SANITATION.

Two enclosures, each housing one rabbit, had an excess of excrete and soiled bedding in them. All animal enclosures need to be cleaned daily or frequently enough to maintain a clean healthy environment for the animals contained in them. A schedule of regular cleaning and sanitizing needs to be in place and maintained.

Inspection Report

3.131(a) REPEAT

SANITATION.

The enclosures housing the ferret, degu, and gerbils all had an excess of excrete in them. It was apparent from the amount of excrete present and soiled bedding material that these enclosures had not been cleaned on a regular basis. All animal enclosures should be cleaned daily or frequently enough to prevent the build up of excrete and soiled bedding material. A regular schedule of cleaning animal enclosures needs to be in place and maintained.
