Site: 002
RICHARD EVOLA

Type: ROUTINE INSPECTION
Date: 10-AUG-2017

2.40(a)(1) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The program of veterinary care lists use of Ivomec for blood parasites but does not list frequency. The program of veterinary care includes vaccines that the owner does not use. The program of veterinary care lists use of Ivomec only for intestinal parasites and the owner alternates dewormers. Some of the diet recommendations listed on the program of veterinary care do not coincide with the diets fed by the owner.

Each exhibitor shall employ an attending veterinarian. In the case of a part-time veterinarian, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the exhibitor.

The program of veterinary care must better reflect what the owner actually provides to the animals with changes to the program that the attending veterinarian deems necessary.

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The hooves on the zebu are overgrown and need to be trimmed.

Each exhibitor shall establish and maintain programs of veterinary care that include the use of appropriate methods to prevent, diagnose and treat injuries.

Hoof care in animals is very important to prevent injury to the animal and to prevent an abnormal gait which can lead to chronic pain.

2.40(b)(3) DIRECT REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

There is a light brown, female goat that the owner says is 14 years of age and is housed by itself. This goat is very thin. There are no records showing that this animal has been discussed with the attending veterinarian.

Inspection Report

Each exhibitor shall establish and maintain programs of veterinary care that include daily observations to assess the health and well-being of the animals held at the facility. The attending veterinarian must be made aware of all problems of animal health and well-being.

Ensure that animals are observed daily for any problems with their health or well-being and notify the attending veterinarian when issues are found so that the animals can receive appropriate veterinary care. Document any and all contact and visits with the veterinarian including diagnosis, treatment and when a recheck with the veterinarian may be needed.

3.125(a) REPEAT

FACILITIES, GENERAL.

The 3 African Crested porcupines that are housed together in an outside enclosure have buried chain link under their enclosure. There is a wire from the chain link that has come loose and is sticking up into the enclosure.

Outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury.

Replace or repair the wire to protect the animals from injury.

3.127(d) REPEAT

FACILITIES, OUTDOOR.

There is no perimeter fence for the camels.

All outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height, not less than 6' for non-dangerous species, to keep animals and unauthorized persons out. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

A perimeter fence must be constructed or a perimeter fence variance must be requested.

Inspection Report

3.130

WATERING.

The only water the armadillo is routinely given is the water added to its main diet, which is dog food, to soften the dog food.

If potable water is not accessible to the animals at all times, it must be provided as often as necessary for the health and comfort of the animal. All water receptacles shall be kept clean and sanitary.

Water, in a clean and sanitary container, must be offered to the armadillo to sustain and maintain health.

Corrected at time of inspection and from now on.

The inspection and verbal exit were conducted on August 10, 2017.

NO REGULATED ACTIVITIES MAY BE CONDUCTED UNTIL A VALID USDA LICENSE IS OBTAINED.

No exhibition or sales of regulated animals can be done until a USDA license is obtained.
