### 3.75(c)(2)

#### Housing facilities, general.

Building 23 housing juvenile Baboons and Building 111 housing rhesus macaques have numerous walls in the animal enclosures where paint is peeling off the cinder block walls. In some areas the cement surface of the cinder block is exposed. Surfaces in this condition are difficult to sanitize properly. All surfaces must be maintained on a regular basis.

CORRECT BY : 9/20/21

This inspection and exit briefing were conducted with the attending veterinarian and facility employees.
