Customer ID: **6937**
Certificate: **58-C-0612**
Site: 007
JSPA INC

Type: ROUTINE INSPECTION
Date: 18-AUG-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

One bottle of injectable Baytril and one bottle of injectable Ivermectin were found inside a storage cabinet with no refrigeration and with a needle attached to draw the medication without an attached syringe. The open end of the needle is an access point of air or any contaminant that may spoil the medication. The expiration date was good and the Ivermectin bottle was nearly full.

In order to provide appropriate methods to treat diseases, parasites, etc. medicines must be kept in a proper environment and free from contamination.

To be corrected immediately.

An exit interview was conducted with the facility representative.
