### 3.125(a)

#### Facilities, general.

Part of the wooden door to the indoor housing of the porcupine enclosure was jagged and had several exposed screwheads. This could cause the animal to become injured. The facility must be maintained in good repair in order to prevent injury to the animals. The facility must correct this issue.

### 3.154

#### Environment enhancement to promote psychological well-being.

A plan had not been documented for environmental enhancement for the birds housed at the facility. A species specific plan to promote the psychological well-being of birds must be developed and documented and approved by the attending veterinarian. This is required in order to verify that the psychological needs of birds are being met. The plan must be in accordance with the regulations in this subpart and with currently accepted professional standards and be made available during an inspection by APHIS officials.
