Type: ROUTINE INSPECTION
Date: 03-SEP-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

There are three adult Schnauzers with excessive mats covering 60-70 % of their body. A white Schnauzer, identification number, 145271146A, a black Schnauzer, identification number, 4C182A340D, and a Greyish/white Schnauzer, identification number, 4C17786425. These dogs were matted around the head and face, limbs, back, and hindquarters. The hair was heavily twisted; the skin could not be visualized in some areas. The matted hair was soiled and wet, and had debris intertwined with the hair. Excessive matting can cause pain and discomfort to the animal. In addition, matting can foster skin infections and can hinder the animal's ability to move or defecate normally. The licensee needs to remove the matted hair and or/groom these dogs. As part of the facility's program of veterinary care, the licensee must establish and follow a program of regular coat maintenance for all the dogs to prevent the development of excessive matting. The licensee must ensure that all animals receive adequate veterinary care at all times. Correct by 09-10-2014.

This inspection and exit briefing were conducted with the facility owner.
