

## Inspection Report

The Catty Shack Ranch Wildlife Sanctuary  
Po Box 77057  
Jacksonville, FL 32226

Customer ID: **7460**

Certificate: **58-C-0630**

Site: 001

THE CATTY SHACK RANCH WILDLIFE SANCTUARY

Type: ROUTINE INSPECTION

Date: 15-DEC-2015

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Several boxes of sutures, antiseptics, & medications were observed to be expired. Expired medications are considered adulterated & ineffective. Their use is not an appropriate method to prevent, control, and treat diseases and injuries and cannot be used on regulated animals.

Establish a system to check for expired medications, sutures, antiseptics, etc. and remove them where they become expired.

The facility checked all medical supplies and the expired ones were removed & re-inspected prior to the end of the inspection.

No further correction required at this time.

### 2.75(b)(1)(3)

#### RECORDS: DEALERS AND EXHIBITORS.

The licensee acquired a coatimundi on July 28, 2015. The licensee did not obtain either the USDA license number OR the drivers license number & the vehicle tag number of the person from whom you acquired the animal.

For every acquisition, you must obtain the drivers license number AND the vehicle tag number of the person from whom you acquired the animal if they are not USDA licensed. If that person is USDA licensed you must obtain that number.

Correct upon next acquisition.

### 2.131(b)(1)

#### HANDLING OF ANIMALS.

"Terry" (tiger) has a link type collar around his neck. The links are attached together by a metal padlock which hangs from the collar. This padlock places unnecessary weight on the links & collar, as well as unnecessary

Prepared By: ROBERT BRANDES, D V M USDA, APHIS, Animal Care

## Inspection Report

---

discomfort to the animal due to the hitting of this dead weight against the neck. This design also increases the risk of entrapment of the collar.

This collar can be attached by other means to minimize the weight and discomfort that now exists.

Correct by December 17, 2015

### 3.125

#### **FACILITIES, GENERAL.**

Clawed & splintered wooden cable spools were in enclosures # 4, 6, 18 & 20. There were also clawed and splintered wood resting surfaces in enclosure # 5 & 8.

These surfaces have splintering wood which pose a risk of injury to the cats.

The housing facilities shall be maintained in good repair to protect the animals from injury. These surfaces shall be repaired or replaced.

Correct by January 2, 2016

The exit interview was conducted with the Animal Health Coordinator.
