YALE UNIVERSITY

Type: ROUTINE INSPECTION

Date: 09-JUN-2025

3.84(c)

Cleaning, sanitization, housekeeping, and pest control.

G2-23: An open bag of sugar-coated cereal was found on a cabinet shelf in the procedure prep room. This room is used to prepare animals for procedures and to store/prepare medications. It is not an area intended or used for food storage.

Per this Section, premises where housing facilities are located must be kept clean to facilitate housekeeping practices and to reduce or eliminate living areas for pests. Although no pests were noted, the presence of an opened package of sugar-coated cereal in a cabinet located in an area that is not used for food storage can attract unwanted insect pests. The research facility corrected this item during the inspection by discarding the opened bag of cereal. To remain corrected from this date 6/11/25 forward.

This inspection was conducted with facility representatives from 6/9/25 through 6/11/25. The exit briefing was held with facility representatives 6/11/25.
