### 2.131(c)(1)

#### HANDLING OF ANIMALS.

There are 2 barrier fences at this facility. The first is constructed of panel fencing with a flat top rail and is 2 feet from the primary enclosures. The 2nd barrier fence is a 2 rail pipe fence and is 4 feet from the enclosures. There is concern that small children can pass under the rail of the pipe fence and come within 2 feet of the primary enclosures. The public has been observed allowing children to sit on the top board of the first barrier fence which is close enough to allow contact with the animals. There must be sufficient distance and barriers between the animals and the viewing public to assure the safety of the animals and the public. The barrier fence must be corrected to prevent public contact with the animals.

CORRECT BY : 1/1/16
