

Inspection Report

GULL MEADOW FARMS L L C
8544 Gill Rd
RICHLAND, MI 49083

Customer ID: **328521**

Certificate: **34-C-0351**

Site: 001

GULL MEADOW FARMS L L C

Type: FOCUSED INSPECTION

Date: 22-NOV-2021

2.40(b)(3) **Direct** **Repeat**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

-One of the two zebu has a horn that has turned and is growing into the forehead of the zebu.

-The only alpaca was not groomed this spring and is matted and scratches approximately 50% of the time. The alpaca also has overgrown teeth.

The attending veterinarian was not called until last week. The attending veterinarian was off the day the facility called. No contact or appointment has been made with the attending veterinarian.

Daily observations of all animals must be accomplished daily. If someone other than the attending veterinarian conducts daily observations a method of direct and frequent communication with the veterinarian must be established so that timely and accurate information on problems of animal health, and well-being is conveyed to the attending veterinarian.

The veterinarian must be contacted in a timely manner with any problems of animal health and well-being to prevent prolonged pain and suffering.

2.75(b)(1) **Repeat**

Records: Dealers and exhibitors.

Inspection Report

The record of animals on hand is still not accurate. It does not include the disposition of the pigs used for the pig race.

Every exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control or disposed of, which has died, or been euthanized.

Ensure that accurate records of animals on hand are completed to be able to trace and track animals in case of disease outbreak, and to ensure all parties that require a license have an active license.

3.125(a) Repeat

Facilities, general.

The sheep and goat shelter on the SW corner of the enclosure still has both back corners in disrepair and flashing loose that creates sharp points.

-The interior sheep gate, and goat panel wall along the inside walk is still dented out causing sharp points at the bottom where the wire has been cut. These points are now sticking inside the enclosure.

The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

Primary enclosures for animals must be kept in good repair to prevent injury to the animals contained in the enclosure, and to prevent escape of the animal, or entrance of another animal.

3.131(a) Repeat

Sanitation.

Inspection Report

The goat walk still has excessive feces on it. The caretaker stated that the goat walk is cleaned twice yearly.

Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.

The goat walk still needs to be cleaned as often as necessary to prevent contamination of the animal, and minimize disease hazards.

This inspection and exit interview were conducted with the barn manager.
