#### Requirements and application

The licensee is authorized to possess up to 600 animals for regulated purposes under his current license. During the inspection of both sites, 605 were observed, counted, and/or listed on the inventories between the two active sites. Accurate numbers of animals and species must be documented and accurately reflect the license held in order to ensure that the facility and personnel possess adequate facilities, employees and education to provide sufficient husbandry to the regulated animals. Cease regulated activities and reapply for a license that properly reflects the number of regulated animals under the license or reduce the number of regulated animals to a number which is under the maximum threshold authorized under the current license.

This inspection and exit interview were conducted with site employee.
