Scatter Joy Acres  
4966 Newport Avenue  
Omaha, NE 68152

Customer ID: **327646**  
Certificate: **47-C-0059**  
Site: 001  
Scatter Joy Acres Inc.

Type: ROUTINE INSPECTION  
Date: 15-MAY-2017

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The program of veterinary care did not include all of the species located at the facility. The Dromedary Camel, and domestic cats and dogs were absent from the plan. A facility representative stated they had the Dromedary Camel since December of 2016. The dogs and cats became part of the exhibition when the property became a location of public entrance for the viewing of all animals on the property. Previously, only animals that were taken to off-site locations for petting zoos were on exhibition.

The lack of guidance for appropriate methods to maintain the health of all regulated animals can cause preventable injury or disease, and/or the wrong treatment and care for the animal when something does occur. The licensee must make formal arrangements with an appropriate and knowledgeable veterinarian which includes a written program of veterinary care for all regulated animals at the facility to include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care.

TO BE CORRECTED BY: May 19, 2017

### 3.125(a)

#### FACILITIES, GENERAL.

A piece of wire fencing attached to the bottom of a metal tube gate had broken wires that stuck into the enclosure with one farm hog and five potbelly pigs. The farm hog was rooting in that portion of the enclosure.

Broken wires and sharp points can cause injuries to the animals in the enclosure. The facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

TO BE CORRECTED: Corrected at the time of the inspection.

### 3.127(d)

## Inspection Report

---

### FACILITIES, OUTDOOR.

The perimeter fence around the Dromedary Camel enclosure was not six feet tall in several locations. Also, there were sections of approximately six foot fence that were supported with posts that were shorter than six feet making it flexible. The fence was easily bent to the height of the posts with a light push from a human hand effectively making it less than six feet in height

A perimeter fence that is not of sufficient height and construction does not protect the Dromedary Camel from other animals and unauthorized persons. The fence must be at least six feet in height, and constructed so that it protects the animals in the facility by restricting animals and unauthorized person from getting through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

TO BE CORRECTED BY: June 12, 2017

This inspection and exit interview were conducted with three facility representatives and ACI Bartels.
