Po Box 1150
Dalhart, TX 79022

Customer ID: **329347**

Certificate: **74-R-0212**

Site: 001

Veterinary Health Source L L C

Type: ROUTINE INSPECTION

Date: 25-JAN-2017

2.33(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

Two adult female basset hounds (id numbers 5 and 37) had reddened skin on the inside of all four legs and on their abdomens. Neither dog exhibited any signs of discomfort or distress (such as chewing, licking, or scratching). These two dogs were being monitored by the attending veterinarian who was present at the time of the inspection, but no documentation of the attending veterinarian's diagnosis or treatment plan was recorded in the facility or animal records. A mechanism of direct and frequent communication must be established, maintained, and documented in order to communicate timely and accurate information regarding animal health and well-being between the animal care staff and the attending veterinarian. To be corrected from this date forward.

This inspection and exit briefing were conducted with facility representatives.

Additional Inspectors

Unck Autumn, Veterinary Medical Officer
