Type: RE-LICENSE INSPECTION
Date: 21-AUG-2024

3.127(d)

Facilities, outdoor.

During inspection, two outdoor primary enclosures did not have an adequate perimeter fence of 6 feet in height on all sides:

- Two red kangaroos in one enclosure had two sides of their enclosure (one side facing the parking lot and the other facing the safari road) with an accompanying perimeter fence height of only 4 feet.
 - One side of a Brazilian agouti's enclosure (facing the pond) had a perimeter fence that was only 4 feet high.
- The lack of an adequate perimeter fence presents a safety risk to the animals within the facility in that there isn't an adequate secondary containment system to hold animals that may escape their primary enclosures or a sufficient barrier to keep animals and unauthorized persons out. The facility must ensure that the above listed animals, when housed outdoors, are enclosed by an effective, continuous, 6 feet tall perimeter fence that is at least 3 feet in distance from the primary enclosures or obtain a variance approved in writing by the Administrator.
- Corrected at time of inspection.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by OCTOBER 22, 2024, or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
