Type: ROUTINE INSPECTION
Date: 22-AUG-2024

3.125(a) Critical

Facilities, general.

On May 29th, 2024, a worker found the breeding female red kangaroo "Roo", stuck in the fence prior to the facility opening to the public. The kangaroo was caught between the chain link fencing and the livestock panel fencing. Her head was stuck in a square of the livestock panel fencing. They were able to free her from the fence and immediately transported "Roo" to the attending veterinarian. Despite ongoing medical care, on May 31st, 2024, the attending veterinarian euthanized her due to poor prognosis.

Failure to use appropriate materials and construction may not contain the animal and could result in injury and may lead to the death of the animal.

All enclosures must be constructed of appropriate materials and methods for the species housed within to contain and protect the animals.

Corrections were made by the time of inspection.

This inspection and exit interview were conducted with facility representatives.

Additional Inspectors:

ANN GOPLIN, VETERINARY MEDICAL OFFICER

Prepared By: MARY ANN ARCHER
