CAROLINA TOWN AND AMAZING ANIMALS

Type: ROUTINE INSPECTION

Date: 26-OCT-2016

2.131(e)

HANDLING OF ANIMALS.

Two young pot belly piglets were noted to be huddled and shivering in their enclosure, which contained no bedding or heat source. Pigs this young are not able to thermoregulate adequately and require additional care to prevent being chilled to maintain their health. When climatic conditions present a threat to an animal's health or well-being, appropriate measures must be taken to alleviate the impact of those conditions. An animal may never be subjected to any combination of temperature, humidity and time that is detrimental to the animal's health or well-being, taking into consideration such factors as the animal's age, species, breed, overall health status, and acclimation. Towels and a heat lamp were added during this inspection.

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

Two enclosures housing cats and kittens are dusty, dirty, and have areas of rust. Unclean enclosures can serve as sources of infection and discomfort for the animals contained within. Hard surfaces with which the cats come in contact must be spot-cleaned daily and sanitized in accordance with 3.11(b) of this subpart. All other surfaces of housing facilities must be cleaned and sanitized when necessary to satisfy generally accepted husbandry standards and practices. Sanitization may be done using any of the methods provided in 3.11(b)(3). Correct by November 9, 2016.

3.131(a)

SANITATION.

Hedgehog enclosure contains excess feces buildup, flies, and has an excessively strong odor. Inadequate enclosure cleaning can lead to negative health effects on the animal. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and reduce odors. Correct by Thursday, 10/27/16.

3.131(c)

SANITATION.

Inspection Report

Enclosures housing the ferrets, chinchillas, and sugar gliders are dusty, dirty and have some rust. The medicine storage areas are dusty and dirty. Unclean and disorderly areas can lead to health risks for the animals. Premises shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart. Correct by November 23, 2016.

This inspection and exit interview were conducted with facility representative.
