Stearns Zoological Rescue And Rehab
36909 Blanton Rd
Dade City, FL 33525

Customer ID: **16585**

Certificate: **58-C-0883**

Site: 001

STEARNS ZOOLOGICAL RESCUE AND REHAB

Type: ROUTINE INSPECTION

Date: 29-NOV-2016

3.125(a) REPEAT

FACILITIES, GENERAL.

- In the goat enclosure near the front gate, a layer of wire around a large tree had curled up along the bottom edge, exposing sharp points and a risk of entanglement.
- In the deer enclosure, the top rail of the fence next to a gate had slipped loose and was dangling at one end. This is not secure, and needs to be repaired.
- In the "Fort Dade" enclosures, the wooden center support posts in the middle enclosure and one end enclosure have been chewed and scratched by the tigers to a point where they are too narrow and shredded to be adequate support structures.
- In an enclosure housing 4 tigers in the tram tour section of the park, a wooden resting platform has been chewed and scratched excessively, leaving a row of exposed nail heads along one border of the platform. This is a potential injury risk to the enclosed animals.

All facilities must be maintained in good repair to protect and safely contain all regulated animals.

This inspection and exit interview were conducted with facility representative.

Additional Inspectors

Whiteley Robert, Animal Care Inspector

Prepared By: MICHAEL TYGART, D V M USDA, APHIS, Animal Care
