CEDARS-SINAI MEDICAL CENTER

Type: ROUTINE INSPECTION
Date: 07-JUL-2015

2.33(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

In the pig housing facilities, there was a full unlabeled syringe tucked behind the cage card on the door of the enclosure. According to the facility representative, the syringe contained pain medication that was drawn up for that specific animal for a procedure later in the day.

In one of the procedure rooms, an unlabeled syringe with unknown liquid was adjacent to an automated analyzer on a lab bench.

Without proper labeling of syringes, there might be unintended use of its contents. Medical items intended for animal use should be properly labeled and stored.

Corrected during inspection by facility personnel.

Exit Interview conducted with facility personnel.
