CORYNNE FREEMAN

1489 Live Oak Rd
Coats, NC 27521

Customer ID: **25756**

Certificate: **55-C-0312**

Site: 001

001- CORYNNE FREEMAN

Type: ROUTINE INSPECTION

Date: 26-MAR-2024

3.158(d)

Cleaning, sanitization, housekeeping, and pest control.

The winter parrot barn showed evidence of mouse infestation. There were multiple mouse holes present and several mice were observed in the building. A mouse infestation can result in contaminated food supplies and potential exposure to disease-causing organisms carried by mice. The facility is aware of the problem and has already scheduled a thorough clean-out of the barn, sealing of the building, and improvement of rodent control with an identified pest control company as soon as the birds can be removed and returned to their outdoor aviary as spring temperatures increase. Temporary rodent removal efforts are in place but are not effective at this time.

The regulations state that a safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests must be established and maintained so as to promote the health and well-being of the birds and reduce contamination by pests in animal areas. Correct by May 15, 2024.

This inspection and exit interview were conducted with facility representatives.
