Site: 001
JOHN NEAL HARNESS

Type: ROUTINE INSPECTION
Date: 29-APR-2014

3.28(c)(2)(3)

PRIMARY ENCLOSURES.

The facility is located in a transport type trailer. In the facility there were eight primary enclosures which contained more weaned animals than the provided floor space allowed. The enclosures all provided 144 square inches. There were three enclosures containing 15, 17 and 19 animals each. Three enclosures contained 20 animals each. And two enclosures contained 22 animals. The dealer must provide the minimum floor space for all animals to protect the animals from injury, facilitate husbandry practices and to protect their health and welfare.

Affects one hundred and sixty-nine animals.

Correct by May 5, 2014

3.31(b)

SANITATION.

The facility is located in a transport type trailer. The facility is located in a transport type trailer. Sitting on the top of a set of enclosures there were chemicals such as Sevin dust and rat poison. Through-out the facility there was dust, spider webs, spilt food and bedding on the supporting framing and floor. The facility needs to be cleaned and maintained to facilitate husbandry practices, protect the animals from injury and to protect their health and welfare.

Affects two hundred and thirty-two animals.

Correct by May 5, 2014

The inspection and exit briefing was conducted with the Dealer
