Certificate: **43-A-1563**
Site: 001
ROSILEE MC NAIR

Type: ROUTINE INSPECTION
Date: 15-JAN-2015

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The licensee is not scheduling regular visits to her facility by her Attending Veterinarian. Her Program of Veterinary Care states that these visits will occur annually or more often if needed; however, the last visit was on November 25, 2013. These visits are necessary to ensure that the Program of Veterinary Care is being understood and followed by the licensee, to check the health of the dogs, and to determine if changes in the Program of Veterinary Care are needed. The licensee must ensure that the Attending Veterinarian is visiting her facility on a regular basis.

TO BE CORRECTED BY FEBRUARY 15, 2015.

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An adult male French Bulldog named "Pierre" had excessively long toenails on both front feet. The toenails caused the toes to be displaced sideways when he stood, especially when on a solid surface. Also the toenails curled around the wire on the floor and sides of the enclosure as he stood on and jumped against the wire. Excessively long toenails can result in injury from getting hooked on the wire, can affect the dog's normal gait due to the displaced toes, and can be painful. The licensee must trim this dog's toenails and must establish a maintenance program for toenail care for all dogs.

TO BE CORRECTED BY JANUARY 20, 2015.

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

Six dog doors in the Sheltered housing facility had an excessive buildup of dirt and grime on their surface, appearing as a dark brown material on the dog doors. Dirt and grime can harbor organisms that can cause disease in dogs. The licensee must spot-clean and sanitize hard surfaces that come into contact with the dogs as often as necessary to satisfy generally accepted husbandry standards and practices.

TO BE CORRECTED BY JANUARY 20, 2015.
