BRIDGES FOR BRAIN INJURY INC

Type: ROUTINE INSPECTION
Date: 15-NOV-2018

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***** The written guidance from the Attending Veterinarian directs the licensee on appropriate preventative care to include annual rabies vaccines in several mammalian species as well as annual TB testing in NHPs maintained at the facility. Currently the pig and coyote are overdue for this vaccine. In addition, annual TB testing is overdue for the Vervet and should have been done in summer 2017. These preventative measures must be done in accordance with the instructions of the attending veterinarian.

Correct by: Dec 16, 2018

2.40(b)(3) CRITICAL

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

*** In September the geriatric Ring Tailed Lemur showed signs of slowing down, sleeping more and going off food according to the facility. The facility did not call a veterinarian, instead called another licensee, and was directed to wait and watch the animal. The animal died a few days later. The facility did not communicate with the Attending Veterinarian the animal's decline in health or that it had passed away. Direct and frequent communication is required with the Attending Veterinarian to convey timely and accurate information on problems of animal health and so the AV has the authority to oversee the health conditions of the animals.
