JODY VANDE WEERD & TOM VANDE WEERD

Type: ROUTINE INSPECTION

Date: 06-MAY-2015

---

### 3.10

#### **WATERING.**

In the large breed dog building, the water receptacles are hard plastic buckets or rubber pans. Three of these receptacles have a buildup of green algae on their inside surfaces. There are a total of seven dogs that consume water from these receptacles. Algae buildup can contaminate the drinking water and increase health risks to the dogs. All water receptacles must be kept clean and sanitized at least once every two weeks, or as often as necessary to prevent the buildup of algae and any other potential health hazards.

Correct by: May 14, 2015

Male Yorkshire terrier, microchip #476736231B, sited under 2.40 (b) (2) on inspection report dated July 23, 2014 has been evaluated by a licensed veterinarian and received treatment.

Exit interview conducted with facility representative.
