SAN DIEGO MESA COLLEGE

Type: ROUTINE INSPECTION
Date: 13-MAY-2015

2.33(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

-A few expired vials of Propofol are being stored in a bag in the freezer. The freezer is located in an area that is readily accessible to the students and/ or staff. According to the facility representative, the anesthetic is being stored there until it can be disposed of. Although Propofol is not a controlled substance, it is an anesthetic that must be used with care and diligence in clinical medicine and research, and should be labeled and stored in a manner which minimizes its potential to be misused.

-Three bottles of expired dental hygiene spray were observed in an exam/ treatment room.

-Un-labeled pill vials containing vitamins were observed in student boxes/trays.

-Three small plastic dispensing bottles with no concentration or expiration dates on label, containing betadine solution, betadine scrub and alcohol, were observed in the crash cart.

Each research facility shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries.

3.1(a)

HOUSING FACILITIES, GENERAL.

In the cat ward, there are two fluorescent light fixtures with bulbs that do not have light covers. In the event of breakage, glass could shatter and injure the cats. Housing facilities for cats must be kept in good repair, and they must protect the animals from injury.

Inspection Report

3.1(c)(1)

HOUSING FACILITIES, GENERAL.

The outdoor dog runs have concrete floors that have not been sealed. The floor surfaces are porous and cannot be cleaned and sanitized as required. Fecal material and other debris can accumulate in small crevices increasing the potential of disease hazards in these areas. The surfaces of housing facilities must be constructed and maintained in a manner and made of materials that allow them to be readily cleaned and sanitized.

To be corrected by August 1, 2015

3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The following housekeeping issues were noted:

- There is a heavy amount of clutter and a moderate amount of dust present in an office/ lab supply storage area. The counter tops and carts are covered in equipment, medical supplies, papers, and other materials. The presence of clutter may impede cleaning.

- In a treatment area, the counter top is cluttered with bags, supplies, and containers. The presence of clutter may impede cleaning.

- In the surgery suite, there are 2 moderately rusty surgery and i.v. fluid stands. The presence of rust can prevent the required cleaning and sanitizing of medical equipment.

- In the surgery suite, there is a moderate amount of dust present on a vent and on cautery units which are being stored on the ground. There is an uncovered small plastic tub containing medical materials being stored on the ground under this vent. There is unused equipment being stored on the top of the cabinets.

Premises where housing facilities are located, including buildings and surrounding grounds, must be kept clean to protect the animals from injury, and to facilitate the husbandry practices required in this subpart. Premises must be kept free of discarded matter.

To be corrected by August 1, 2015

3.25(c)

FACILITIES, GENERAL.

Guinea pig food was observed being stored in an open container. Storing food in this manner may increase the

chance of spoilage or deterioration and infestation or contamination by vermin. Food supplies should be stored in containers with tightly fitting lids or covers or in the original containers as received from the commercial sources of supply.

To be corrected by May 26, 2015

3.125(a)

FACILITIES, GENERAL.

In the hoof stock area, a portion of the fence is damaged and sharp points from the fence are protruding into the animal enclosure. There is a wooden spool platform in an enclosure that is damaged. The wood is splintering and a nail head has become exposed. Animals coming in contact with these areas may become injured.

Outdoor housing facilities, including resting platforms and other furniture, should be structurally sound and should be maintained in good repair to protect the animals from injury.

To be corrected by August 1, 2015

An exit briefing was conducted with the facility representative.
