Site: 001

THE WILDLIFE CENTER AT UNCLE DONALDS FARM INC

Type: ROUTINE INSPECTION  
Date: 04-AUG-2020

### 3.130

#### **WATERING.**

Two water receptacles in the raccoon enclosure contained murky brown water. It was not possible to visualize the bottom of either receptacle. An additional water receptacle in the enclosure was overturned.

Failure to maintain the drinking water receptacles in clean and sanitary conditions could result in water quality that is harmful to animals.

Licensees shall keep all water receptacles clean and sanitary.

Correct by August 6th, 2020.

### 3.131

#### **SANITATION.**

The primary enclosure housing the raccoon is in need of cleaning. The concrete floor of the raccoon enclosure was covered in a black and brown mixture of dirt, mud and excreta. Additionally, there were pieces of palm fronds scattered on the ground. The licensee stated that she gives the raccoon palm fronds to tear up as a form of enrichment. She mentioned that she had not cleaned the enclosures yet that morning. The licensee also stated that the raccoon enjoys playing in her water receptacles and often overturns them. This contributes to the muddy conditions in the enclosure.

Adequate and frequent cleaning is necessary to prevent contamination of the animals and to minimize disease hazards. Excreta shall be removed from the primary enclosure as often as necessary to prevent the contamination of the animal housed within.

Correct by August 6th, 2020.

This inspection was conducted 4 August 2020. The exit interview was conducted on 26 August 2020 with the licensee.
