Type: ROUTINE INSPECTION
Date: 30-MAR-2021

2.75(b)(1)(iv)

Records: Dealers and exhibitors.

*** The licensee did not have disposition records for two foxes that left the facility in August 2020, including the name or address of the location they went to in a neighboring state. These records must be maintained in a timely and accurate manner for recordkeeping purposes.

Correct by: March 31, 2021

3.125(a) Critical

Facilities, general.

*** An African Crested porcupine was found dead in July 2020 in its housing enclosure underneath a log that was on top of the animal. The licensee states that based on their assessment, the animal's back was badly injured and it had appeared the log had fallen on it, trapping the animal underneath. African crested porcupines are prolific diggers which may affect the structural soundness of the substrate under any furniture type item in the enclosure. The facility must ensure that housing facilities are structurally sound and maintained in good repair to protect the animals from injury.

At the time of the inspection, the remaining porcupine is being housed in a different enclosure.
