ANASTASIA KRUSE KANYUCK

Type: ROUTINE INSPECTION

Date: 02-FEB-2017

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The written program of veterinary care (PVC) is incomplete. Revolution is listed for external parasite control, but the concentration of the medication, instructions for use, dose, and route of administration is not listed in the PVC. The program of veterinary care must be complete to provide adequate guidance to the licensee to maintain the health of the hedgehogs.

There have not been regularly scheduled visits to the premise of the dealer. The PVC has not been reviewed or updated by the attending veterinarian in over a year. Failure to provide for regularly scheduled visits to the facility by the attending veterinarian can lead to lack of delivery of adequate veterinary care to the animals. The attending veterinarian must be aware of management practices that affect the animals. Regular scheduled visits by the attending veterinarian shall occur at the frequency established by the licensee and the attending veterinarian in the written program of veterinary care.

Correct by February 23, 2017.

This inspection and exit interview were conducted with the licensee.
