

## Inspection Report

Difco Laboratories  
1475 Athens Highway  
Grayson, GA 30221

Customer ID: **880**  
Certificate: **57-R-0023**  
Site: 001  
DIFCO LABORATORIES

Type: ROUTINE INSPECTION  
Date: 31-AUG-2016

### 2.31(c)(2)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

IACUC meetings are conducted twice a year. Upon review of the minutes for the semiannual meeting of January 2016 there was no information or reference to a facility inspection found in the report. It was determined that during this period the facility was transitioning and no "official" facility inspection was conducted as required. As a result the facility was not officially inspected for a 12 month period. The IACUC is required to inspect all animal facilities every 6 months. With the most recent facility inspection being conducted in June 2016 the next will be due by December 2016.

The IACUC shall inspect all animal facilities and document the inspection no less than semi-annually as required.

Correct by December 2016.

### 3.51(d)

#### FACILITIES, INDOOR.

Interior Surfaces. In building 12 there is a wooden baseboard running along the floor on the right side of the room near the front of the first section. The wood has chipping and peeling paint and appears to be rotten. This wood cannot be readily cleaned and sanitized.

All interior building surfaces shall be maintained so they are substantially impervious to moisture.

Correct by September 30, 2016

### 3.56(c)

#### SANITATION.

Housekeeping. In building 11 in the rabbit room there are accumulations of dust on the pipes and overhead structures running along the ceiling. The dust may fall or be blown into the rabbit food or enclosures potentially causing contamination. The current schedule for cleaning and maintaining the room is insufficient to prevent such accumulations.

01-SEP-2016

## Inspection Report

---

The overhead structures shall be cleaned at a frequency that will prevent such accumulations and protect the rabbits from contamination. Correct by September 30, 2016.

This inspection and exit interview were conducted with the Plant Manager, QMRC Manager, Compliance specialist and Facility Manager.
