Type: ROUTINE INSPECTION
Date: 14-AUG-2014

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An adult female Bulldog named Bonnie (m/c# OAO1782940) was missing a significant amount of hair from her back and sides and had scabs and reddened areas over much of her back and sides. She was scratching, chewing, and licking at the areas during the inspection. The licensee stated that the problem started about 2 weeks earlier and that she had not consulted a veterinarian about the problem. Skin problems can be painful, can lead to other medical conditions, and can be contagious to other animals. The licensee must have this dog examined and treated by a licensed veterinarian. She must maintain medical records concerning this condition and make them available to the inspector upon request.

TO BE CORRECTED BY AUGUST 18th, 2014.

3.2(d)

INDOOR HOUSING FACILITIES.

d) Interior surfaces.

The floor of a primary enclosure housing an adult female Bulldog and her three nursing puppies was not impervious to moisture. Part of the floor was covered by linoleum, but a large area of the linoleum had been torn away, exposing the bare wood beneath it. Floors that are not impervious to moisture can not be cleaned and sanitized properly. The licensee must ensure that flooring is impervious to moisture.

TO BE CORRECTED BY AUGUST 18, 2014.

3.6(a)(2)(4)

PRIMARY ENCLOSURES.

An adult female Bulldog and her three 4-week-old puppies were being housed in a primary enclosure within the licensee's home. The puppies had been whelped in this enclosure which had the door propped open at all times, allowing the female Bulldog to leave the enclosure at will and allowing the two house dogs the ability to enter the primary enclosure and contact the puppies. Contact with dogs other than the dam can result in injury to the puppies. The licensee must ensure that primary enclosures are constructed and maintained so that they keep other

Inspection Report

animals from entering the enclosure.

TO BE CORRECTED BY AUGUST 15, 2014.

3.9(b)

FEEDING.

Two food receptacles, being used by a total of 4 dogs, had an excessive amount of dirt and grime on the outside and inside of the receptacles. Dirty food receptacles can harbor diseases that can affect the health of the dogs and can contaminate the food. The licensee must ensure that food receptacles are properly cleaned and sanitized.

TO BE CORRECTED BY AUGUST 20, 2014.

3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

c) Housekeeping for premises.

Excessive weeds and tall grass were growing adjacent to an outdoor enclosure housing two Beagles. A large vine was climbing up the side of the enclosure to the roofline. Excessive weeds and grass can harbor pests such as rodents, snakes, and external parasites. The licensee must maintain an area around all enclosures that is free of excessive weeds, grass, and brush.

TO BE CORRECTED BY AUGUST 20, 2014.

The inspection and the exit briefing were conducted with the licensee. An inspector from the Missouri Department of Agriculture was also present.
