CRITTERS EXOTIC PETS

Type: ROUTINE INSPECTION

Date: 12-SEP-2018

3.1(a)

HOUSING FACILITIES, GENERAL.

Six small breed puppies were housed outdoors in two chain link kennels, containing three puppies each. Both kennels had damaged areas where the chain link was pulled away from the metal support frame at the bottom. The damaged areas resulted in holes or gaps above the metal supports and crumpled chain link at the level of the puppies. Additionally, ends of the heavy gauge chain link wire were exposed, turned toward the interior of the kennels and accessible to the puppies in multiple areas.

Housing facilities for dogs must be kept in good repair and protect the animals from injury. The animals could become entangled in the damaged fencing and contact with the exposed ends of heavy wire could cause injury. The damaged areas and wire ends should be repaired, replaced or removed.

Correct by: September 20, 2018.

This inspection was conducted with a manager/family member.

The exit interview was conducted by conference call on September 13, 2018 with the licensee and APHIS personnel.
