Certificate: 56-C-0239
Site: TRA
SHARON SANDLOFER

Type: ROUTINE INSPECTION
Date: 04-NOV-2014

2.40(a)(1) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The written program of veterinary care is incomplete in that it does not provide enough details, and during this inspection, the dog part of the program could not be found. Each section needs to be more complete with details of medications provided for parasite control including drug names and dosages. If products are used off label, this has to be approved by the attending veterinarian. The attending veterinarian needs to state how often he is to visit the facility and what vet care needs to be provided for these animals to ensure an appropriate vet care plan is being provided and followed.

2.50(c) REPEAT

TIME AND METHOD OF IDENTIFICATION.

There are currently 9 wolf/wolf hybrids at this traveling exhibit. Although all of the animals are microchipped, the reader is not available, and no variance to use microchipping was obtained. Some of the animals have photo identification, but there are no tags on the cages or with the photo identification. If the microchip method is going to be used as official identification, a reader has to be available and a variance obtained. As an alternative, photo identification along with all the required acquisition information and an official tag can be used.

Exit briefing conducted with licensee. Inspection conducted at Coastal Fair, Ladson, SC.
