Type: ROUTINE INSPECTION
Date: 11-MAR-2025

3.127(d)

Facilities, outdoor.

A portion of the perimeter fence failed to meet the minimum height requirement, without written approval by the Administrator. The facility has two large felines kept in outdoor housing facilities and is required to maintain a perimeter fence at least 8 feet in height. The southern section of the perimeter fence is made up of wooden boards approximately 7 feet in height. This fence is capped with a framed wooden lattice approximately 18 inches tall. The facility is closed to the public during the winter season and will not open back up until April this year. They use this time to make repairs and renovations. Behind the enclosure housing four muntjacs, a portion of the lattice cap, approximately 20 feet in length, was removed so that trees outside the perimeter fence could be trimmed back. At the time of inspection, the facility was not actively working in that area, and the cap was not attached to the fence. As a result, that portion of the perimeter fence failed to meet the 8-foot requirement.

An improper perimeter fence can provide unwanted animals and unauthorized people an opportunity to gain access to the animals behind it.

All outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences less than 8 feet high for potentially dangerous animals such as large felines (tigers, cougars, etc.) must be approved in writing by the Administrator. To be corrected by March 25, 2025.

This inspection and exit interview were conducted with a facility representative.
