FACILITIES, GENERAL.

In at least 4 enclosures the metal frames are rusted through resulting in holes 2-3 inches in diameter with jagged edges. These rusted surfaces may also be affecting the structural strength of these frames. Surfaces with excessive rust and jagged edges may cause injury to the animals. All surfaces must be maintained on a regular basis to prevent excessive rust from developing. Correct by 14 October 2015.

This routine inspection and exit interview were conducted with facility representatives, Robert Bacon, ACI and Kendall Lundy, ACI at the Kansas State Fair in Hutchinson, KS.
